

TECHNICAL GUIDES AVAILABLE FOR THE USE OF RES TECHNOLOGIES IN THE RESIDENTIAL SECTOR

You can get 6 of the revised technical guides on the use of renewable energy technologies in the residential sector in hard copies from the offices of the Cyprus Energy Agency

- Bioclimatic Design and Garden
- Uses of wood biomass - applications in the residential sector
- Geothermal Heat Pumps - - applications in the residential sector
- Photovoltaic Systems - applications in the residential sector
- Solar Thermal systems - applications in the residential sector
- Small wind turbines - applications in the residential sector

Please note that the 6 revised technical guides (issued October 2010) of the Cyprus Energy Agency are also available in electronic form in Greek language on the website www.cea.org.cy under the Renewable Energy section.
