This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement No 864212.

EUROPEAN CITY FACILITY

DESIGNED BY CITIES FOR CITIES TO SUPPORT LOCAL INVESTMENTS IN SUSTAINABLE ENERGY

WHY A EUROPEAN CITY FACILITY?

FACING THE GAP

Local authorities and their groupings have made great commitments to significantly reduce their energy consumption and greenhouse gas emissions. However, when willing to implement their ambitious climate and energy action plans, they often face **financial constraints, as well as a lack of capacity to access the right financing.**

BRIDGING THE GAP

Local authorities are playing a key role in the energy transition in Europe. With **tremendous potential to build comprehensive sustainable energy investment programs**, they can play a key role in pooling smaller projects into larger investment portfolios and in mobilizing significant financial resources for the energy transition.

The EUCF will bridge the gap and **unlock this local potential** to enable municipalities in Europe to **develop relevant investment concepts**.

THE JOURNEY AHEAD

Thanks to the EUCF, European local authorities or groupings of local authorities may benefit from **tailor-made, fast and simplified support** and access the **grant of €60,000** to develop their investment concept - an initial step towards a fullyfledged business and financial plan.

HOW THE EUCF SUPPORTS YOUR JOURNEY
