

Cyprus
Energy
Agency

“ VISION

*To contribute actively to the
conservation of energy resources,
the protection of the environment
and the improvement
of the quality of life „*

Mission the Cyprus Energy Agency

The Cyprus Energy Agency (CEA) is an independent, non-governmental, non-profit organization, founded in 2009. CEA was co-funded by the European Commission, through the Programme "Intelligent Energy for Europe" and by the Cyprus Union of Communities, for its establishment and first three years of operation.

CEA has become an information point for the local society, providing education and vocational training. It participates in projects in partnership with local, European and international organizations, contributing to innovation, research and sustainable development.

It enhances the role of local authorities in sustainable energy planning, providing technical support for developing and implementing actions to mitigate and adapt to climate change.

CEA is also an active member of the Cyprus Hub which is supported by the Institute of Innovation & Technology (EIT Climate-KIC RIS), focusing on education, networking, and the development and promotion of innovative solutions for the shaping of a low-carbon economy. Its vision is a just, inclusive, and climate-resilient Cyprus, that is governed by the principles of sustainability.

Management Board

The Cyprus Energy Agency is managed by an eleven-member Management Board, the members of which are: Union of Cyprus Communities (2 members), Commissioner for the Environment, Environment Department-Ministry of Agriculture, Rural Development and the Environment, University of Cyprus, Cyprus Consumers Association, Cyprus Scientific and Technical Chamber, Federation of Employers and Industrialists of Cyprus, Cyprus Association of Enterprises for the promotion of Renewable Energy Sources, Cyprus Association for Energy Saving Enterprises, Federation of Environmental and Ecological Organizations of Cyprus.

"OBJECTIVES

Promotion of renewable energy sources and sustainable transport, improvement of energy efficiency, and contribution to the mitigation and adaptation to climate change "
