

Free training programmes and free certification from the Technical Chamber of Greece

The Technical Chamber of Greece - TCG invites all those interested to take part in **free training programmes** leading to **free certification** of knowledge by an Accredited Certification Body.

Invitation to 1.300 professionals, engineers, technicians or other related disciplines, as well as any other interested parties to participate in the "**Computing Power Goes Green**" project. The project is part of the Cross-Border Territorial Cooperation Programme "Interreg V-B Balkan-Mediterranean 2014-2020" and is co-funded by the European Union (European Regional Development Fund - ERDF) and national resources (through the PIP).

The objective of the project is the implementation of Counselling, Training and Certification actions for 1.300 beneficiaries, for the acquisition of new knowledge, skills and competences that will substantially enhance the promotion of innovative technologies to improve the effectiveness of environmental protection and the efficient use of resources, as well as support modern companies in the adoption and implementation of new environmentally-friendly methods and practices.

In this context, **1 group counselling session for each beneficiary**, lasting 45' minutes, will be implemented, as well as the two (2) following training programmes:

- **IT Infrastructures and Systems and Environmental Sustainability**
- **Modern, near-zero energy professional spaces**

Each beneficiary can attend only one (1) of the above training subjects. Each of the two training programmes includes **40 hours of distance theoretical training** leading to a corresponding Certificate of Knowledge and Skills. **Participants are not charged for attending the programme and the Certification and do not receive a training allowance.**

The aim of the training programmes is for the beneficiaries to acquire additional knowledge, skills in the field of innovative technologies to improve the effectiveness of environmental protection and the efficient use of resources. Participation in the examinations to obtain the certification according to the ISO 17024 standard, which guarantees professional rights at European and international level, will contribute positively to the enhancement of employment.

Detailed information about the Programme can be found on the platform <https://katartisi-green.tce.gr/en/>, through which interested parties can fill in the application form and digitally upload the required documents. In order to support the interested parties in submitting their application and throughout the project, the TCG provides support services at the call centre **2144089311** and via Helpdesk at the e-mail address: katartisi-green@tce.gr
